INDUSTRY EXPERIENCE

Kylo Apps

Internship- Flutter Developer Intern   **01 July 2022 – 31 July 2022**

- Technologies: **Flutter**, **Firebase**, **FCM**
- I created a social media android application. This has features like authentication using **email, google sign, and Facebook sign-in**. In this app, users can post images on Instagram. It also contains features like **push notification** which was implemented through **firebase messaging**.

Steam Troops Innovation Labs Private Limited

Internship- Android Developer Intern   **11 October 2021 - 08 February 2022**

- Technologies: **Flutter**, **JavaScript**, **Nodejs**, **Mongo DB**
- I developed an android application that facilitates customers in restaurants to place an order in a restaurant using Flutter. I also created a backend using **NodeJS** that connects to a **NoSQL** database (**Mongo DB**). The backend application contains features like user authentication, database management, etc.

PROJECTS

1. **Covid-19 Tracer:** A react based site which provides live data on COVID-19 cases with the help of Global Coronavirus API. source code

2. **Restaurant POS App**: A flutter app which facilitates user staff members in a restaurant to place and manage orders. This app is connected to NodeJS backend and store all the data on server.

3. **TV Maze App**: Tv Maze app is an android application created using flutter framework which uses TV Maze API to display its data in beautiful User Interface. This app helps user in keeping tracks of all your TV Shows.

4. **ToDo List App**: To-Do List App which is simple and easy-to-use app that helps in managing daily tasks and set reminders for important assignments.   Play Store link

ACADEMIC QUALIFICATIONS

Bharti Vidyapeeth College of Engineering   **2020-Present**
Bachelor of Technology – Computer Science
CGPA: 9.54

Pusa Institute of Technology   **2017-2020**
Diploma in Electronics and Communication
Percentage: 83%

BVM Public School   **2017**
10th class
CGPA: 10

Skills

Programming: C, C++, Python
Web Development: HTML, CSS, JavaScript, MySQL, Mongo DB, React, Nodejs
Android Development: Flutter, Java, Kotlin
Other Technologies and Tools: Git and GitHub, Firebase, Visual Studio Code and Android Studio

ACHIEVEMENTS

- Solved **200+** questions on **Leetcode**
- Scored **63 Rank** in **BKPD2022 Code Chef Competition**
- Participation in NASA's International Space Apps Challenge
- Contributed to an open-Source repository with 150+ stars. Link
